The diagram illustrates the movement of a mechanical joint. It shows three different orientations of the joint, with arrows indicating the direction of movement. The joint consists of a central body with two mounting plates, one on each side. The central body has a slot and a pin, and the mounting plates have holes for screws. The arrows indicate that the joint can move in multiple directions, including up, down, left, and right.

Diagram C shows two long, thin metal rods with threaded ends, secured by two screws.
